Hobby Home

Github: https://github.com/ajohnso5/CS546-Final-Project

Our Project:

Our project would be a database related project in order to store and display personal achievements in different hobbies. The idea is to compile data on hobbies so that users can see what other people have achieved.

Features:

Core:
- Authorized Users:
  - can add results for certain hobbies
  - create a hobby if it doesn't exist
- Any user can search for results from database
  - Find results from specific competitor or group
  - Find results from different events or years

Extra:
- Overall leaderboard
- Unique sorting methods
